

Beat a Soup

Beat a Soup is really similar to an arcade game, it has 4 buttons and LEDS beside them, when the LED lights up you have to press it in a limited time, if you don't Soup will beat you, but if you do YOU will beat Soup. There is also a Soup button which you have to press at right time and with the right pressure or Soup will beat you again but if you do it once again you will beat soup, your goal is to bring down Soups HP to zero (you won't kill Soup with this DW:~).

Soup art yipeee

final productttt

github repo:

Features:
